# Managing Small Amounts of Waste in the Medical & Dental Field

# Veolia's Solution

Medical and dental offices, labs and clinics generate various types of waste, including hazardous, universal and solid waste. Proper management of these materials is essential for protecting health and the environment. Here at Veolia we can help with this!

We offer compliant and cost-effective small quantity waste services tailored to your practice's needs, whether you're managing an existing office, opening a new one or overseeing multiple facilities. RecyclePak® makes proper recycling easy. One price includes everything you need to begin recycling.

## About Us

From onsite pick-up to final treatment or disposal, Veolia North America's Environmental Solutions and Services group assures safety, environmental responsibility and regulatory compliance by channeling hazardous waste through our network of over 400 company-owned or certified service centers nationwide. These service centers include treatment, recovery and disposal facilities, sales offices and transportation locations.

## Why Veolia?

### Environmental Compliance

We maintain an excellent record of compliance with regulations governing health and safety and the environment.

We follow procedures meticulously with our on-site teams, and continue to focus on the details throughout transportation, treatment and disposal.

### Financial Strength

Veolia is the international leader in providing environmental services for waste, water, and energy. With over \$25 billion in revenue, it is the largest environmental services company in the world.

### Technical Expertise

Our account, project and technical representatives understand hazardous and nonhazardous waste and the related regulatory requirements. Over 2,500 Veolia employees are ready to assist you in any way - from providing information about government regulations and answering technical questions regarding treatment alternatives, to training your employees and setting up disposal programs that save you time and money.
